Title:

GroKit– An Online Grocery Management System

Objective:

The objective of the online grocery management system is to develop a smart and user-friendly web site that simplifies the grocery shopping process by allowing users to select recipes and automatically generate accurate shopping lists based on ingredient requirements and product availability. The system aims to provide time-based grocery suggestions for different meals such as breakfast, lunch, snacks, and dinner, while also suggesting suitable alternatives when items are out of stock. GroKit focuses on saving users' time, reducing manual effort, and improving shopping convenience by supporting ready-to-cook and instant food items, along with premium features like recipe videos and diet-friendly information, making it a complete and efficient online grocery solution.

Introduction:

In today's digital world, online grocery platforms have become essential for modern consumers. GroKit is designed as a complete online grocery management website that provides a seamless experience for users to select recipes and purchase grocery items from various categories. The system ensures smart shopping list generation based on ingredient requirements, real-time product availability, and time-based meal recommendations. It also supports alternative product suggestions, ready-to-cook and instant food items, and premium features such as recipe videos and diet-friendly information. This project aims to simplify grocery shopping by offering a convenient, efficient, and intelligent web-based grocery solution.

Modules:

Main Modules are

- **Admin Module:**
    - Login
    - Homepage/Dashboard
    - Master Entries
        - Location
            - District/Place
        - Product Masters
            - Category, Subcategory, Brand etc.

- Registrations Rules
    - Seller/User/Delivery/Informer
- Recipe/Diet Info Adding
- Premium plan adding
- Manage Seller
    - Accept/Reject (Send Mail)
    - Accepted List
    - Rejected List
- User List
- Seller List
- Delivery List
- Manage Complaints and Feedbacks.
- Generate Report

- **Delivery Module:**
    - Login
    - Homepage/Dashboard
    - Settings
        - Profile/Edit Profile/Change Password
    - Delivery Assign View
    - Status Updation

- **Seller Module:**
    - Login
    - Homepage/Dashboard
    - Settings
        - Profile/Edit Profile/Change Password
    - Product Upload (Product List)
        - Rate, Stock, Offer, Gallery etc.
    - View Order from Users
    - Delivery Assign
    - Update Delivery Status View
    - View Ratings, Comments etc.
    - Manage Complaints and Feedbacks.

- **User Module:**
    - Login
    - Homepage/Dashboard
    - Settings
        - Profile/Edit Profile/Change Password
    - Product View
    - Search Products
    - Add to Cart

- Payment
- View Order Status
- Delivery Updation View
- After receiving products
  - Ratings
  - Comments
- Post Complaints and Feedbacks.
- Recipe/Diet Info View
  - Ratings
  - Comments

- **Guest Module:**
  - Seller Registration
  - Informer Registration
  - User Registration
  - Delivery Registration

Technology Used:

- **Frontend:** HTML, CSS, JavaScript, Bootstrap
- **Backend:** Python + Django
- **Database:** SQLite
- **IDE:** VS Code, DB Browser
- **Tools & Libraries:** AJAX, jQuery, Font Awesome
- **Security:** Basic input validation and secure session handling

Company Profile

Company Name : Progressive Cybernetics Pvt. Ltd. (PCPL)

Industry : Information Technology & Software Services

Founded Year : 2000

Headquarters : Kochi, Kerala, India

Official Website : www.pcplglobal.com
